

The Life & Times of Lee Harris

words & Design
by River Styx

Lee Harris is a truly inspirational man whose open heart and sense of humanity has touched a lot of people throughout the years. His lust for life and his "forever young" character is something I and many others are always very inspired by.

Whenever I'm asked to describe what Lee Harris does or has done, I find myself embroiled in at least an hour long conversation because talking about any single aspect of his life simply isn't enough as he's done so much.

From human rights activism in South Africa to actor, playwright, publisher, producer and poet in London this man is a testament to making life into art. Consistently at the fore front of cutting edge art forms from the Love generation in the swinging sixties to the rave culture in the eighties and now Hip Hop, he cannot be contained in any pigeon hole as he is constantly moving into fresh avenues of creation.

What more can I say except on behalf of myself and all the many people he's touched and connected...Thank you Lee
